

**Your Economic Healthy Air/ Water Purifier!**

Have you ever concerned about your daily water is safe?  
Do your room has smell sometimes?  
AQUAPURE economic purify solution can do it!

**P**retty design

**U**seful product

**R**eliable

**I**nternational type

**F**antastic performance

**Y**es, you worth it

Model Number:

**AOT - WP - 03**

→ Generation 3

→ Water purifier

→ Aquapure Ozone Tech

# Why using it?

◆ Using ozone activated water purifier in the kitchen , you can remove most of the unwanted substances in the water.

◆ Now food such as vegetables, fruit, fish and meat can be really cleaned of bacteria, germs and insecticides.

◆ You can now disinfect the water just by simple operation. It is a sensible way to live healthier.

◆ Just a few minutes to removes the bad odors from home , keep your place fresh 24 hours!

1. The unit is a professional high-output water ozonator with an ozone output rating of 400 mg/h. it blows the competition away in terms of ozone output, durability and features.

2. The unit features the most powerful pump in its class which helps to ensure that all the ozone produced by the unit is fully utilized.

3. It is also fully programmable .

4. This unit can be either placed flat on a desk/counter or wall mounted for a permanent installation.

Ozone output: 400mg/h	Voltage: 110/220V, 50/60Hz
Power: 12W	Size: 188x 70 x 268 mm
Weight: 1Kg	Color: White
Timer: 5,10,15,20,25,30 mins	Application: water/air treatment
Inner carton: 317*117*239mm	Outer carton : 604*332*495mm, 10pcs/carton

Ozone is often referred to as Nature's Cleaner: It is the most effective disinfecting agent commercially available. Ozone is widely used in Europe and North America to sanitize air and water. It is environmentally friendly and economically efficient. Ozone greatly diminishes the need for alternative chemical sanitizers, like chlorine, and in many applications reduces water consumption needs.

#### Product advantage:

1. Energy saving-----only 12W
2. No pollution-----Unstable ozone
3. multi-use function
4. Truly environmental
5. Easy operation

## Food Sterilization

Foods are exposed to pathogenic bacteria, antibiotics, growth hormones and pesticides in the process of growing and packaging. At retailers, where foods are purchased, are exposed to bacteria from the hands of vendors and customers. When fruits, vegetables, seafood and meat are placed in ozonated water, surface bacterium is killed. Harmful pesticides and herbicides are rendered useless, making foods safer to eat.

## Sterilize Utensils

Salmonella, E.coli, and many other pathogens that cause food poisoning can often be found on utensils and dishes especially while you are cooking. Washing utensils and dishes that are in contact with meat and vegetables with ozone water will eliminate many common food-borne pathogens and also prevent cross contamination from handling. The operational cost for the production of ozone is minimal compared to your other expenses.

## Purify Water

Ozone purifies the water by stabilizing chlorine residues, heavy metal ions, and various organic impurities that cause unpleasant smells, making tap water undrinkable. As a result, ozone water used in coffee or tea, will taste better. This is the same purification process used by bottled water companies. Ozone water kept for drinking should be left for half an hour before consumption to allow the ozone to dissipate.

## Oral Hygiene

Toothbrush bristles become infected by airborne bacteria, toothpaste residue and food particles from your mouth. Soaking your toothbrush in ozone water for a few minutes every day will destroy bacteria that reside on the bristles. Gargling with ozone water can remove unpleasant odours to keep the mouth fresh and prevent oral infections. It can also treat canker sores and other sensitive oral areas.

## Natural Skin Care

Ozone water is an excellent natural skin treatment for softer and healthier looking skin. It helps to keep the skin clean from germs and less drying than ordinary chemical cleansing substance. Ideal for facial cleansing to reduce pimples caused by germs on your skin. Ozone water is also excellent for topical treatment to wash sores, ulcers, burns, and use to promote the healing of wounds and skin diseases caused by red, dry, scaly skin inflammation.

## Remove odours

This unit generates ozone which is a powerful oxidizing agent, it will have oxidizing reaction to harmful toxic ingredients and odours organics in the air, removing bad smells and relieve toxicity, and without any secondary pollution. Ozone is a powerful oxidizing agent, it can kill various bacteria & germs in the air. Only a few minutes to improve air quality, sterilize germs, and create a healthier environment to Live in.

Very Convenient to Use It!  
Just connect power and switch on the machine, put the diffuser stone in water , will disinfect water itself. If you need it to clean air, jut remove the silicone tube and diffuser stone.  
You can have a convenient and sensible way to live healthier.

We offer :  
2pcs diffuser stone  
Silicone tube  
User manual  
Power cable
