

Eco commercial ozone water Purifier

Magnetizer water
Sterilization disinfection purification
High gas-liquid mixture
Efficient Energy conservation
No pollution

Application: public washing purifier, including hotel, school, swimming pool, hospital

ECO Commercial Purifier is an environmentally friendly high efficient appliance applied in hospital, swimming pool, school, hotel, wash house and other public place. With the high-efficiency of sterilizing, disinfecting and purifying commercial water, ECO Commercial Purifier is aiming at reducing the damage resulted from the bacterial which may be spread through water.

ECO Commercial Purifier adopts advanced nanotechnology and permanent magnetic material to pre-treat the tap water, through mixing the water in the static mixer for the first time, and then mixed with controllable ozone, through the second time in the static mixer to make sure appropriate gas-liquid mixing proportion.

ECO Commercial Purifier contains no water storage, meaning to purify and use water simultaneous, to avoid the second pollution due to storage

ECO Commercial Purifier has the main superiority as below:

- Magnetize water as pre-filter;
- Sterilization and disinfection;
- Decontamination and purification;
- High gas- liquid mixture & no water leakage & no air leakage;
- High Efficient, Energy conservation and environmental protection;
- CE & RoHS

Product Specification

Product Name	ECO Commercial Purifier
Model	AOT-WP-04
Electrical	Input: AC 100-240V/50-60Hz Output: DC 12V 7.5A 90W
Water Pressure	35PSI~125PSI
Water Flow	7.5-30 L/min
Operating Temperature	0°C~40°C
Ozone Concentration	0.8~1.3mg/L
Product Dimension	66cm×45cm×14.6cm
Weight	7.0 KGS
Carton Dimension	79cm×22cm×54.5cm
Loading Capacity	303/ 20' 628/40' 736 /40HC
